

Game concept:

Logic: controlled by arrow keys
player is restricted by game window
enemy moves left to right and changes direction
upon touching other side of screen
goal changes position when player touches it
and size
game over screen is triggered when player touches
enemy
player can press SPACE after losing

Player will be a blue box
enemy will be a red rectangle
goal will be either a yellow square or circle (?)

Stuff I might add:

- enemy speed changes every time player touches goal
(increases)
will have limit so enemy isn't too fast
- number counter indicating what stage
- goal will be either a circle/square every new stage
(dimensions / radius will also be randomized)
and pos
